Prompt-structure ablation — structured P/S/Q rubric vs unstructured single-number coverage
(a) Per-cell coverage: structured vs unstructured
n = 36 cells
Pearson r = 0.878
MAE = 0.106
within ±0.20 (94%)
within ±0.10 (67%)
y = x (perfect agreement)
Unstructured-prompt coverage (single-number)
Structured-prompt coverage (P/S/Q rubric)
(b) Distribution of per-cell diffs
within ±0.10: 24/36 (67%)
within ±0.20: 34/36 (94%)
mean diff: -0.026
Number of cells
Per-cell diff (unstructured − structured)
(c) Per-report MMRI Pearson r = 0.932 Spearman ρ = 0.886
structured (P/S/Q rubric)
unstructured (single number)
